PERSONAL PROFILE

I am a driven frontend developer with a deep understanding of modern technologies and a desire to create unique user interfaces. My experience with React and Redux has successfully helped me tackle complex tasks while maintaining focus on performance and code quality.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS
Libraries: React, Redux Toolkit, React Router, Framer Motion
Developer Tools: Git, GitHub, VS Code

PROJECTS

PizzaShop | *React, Redux Toolkit, Axios*
- Development of an interactive online store using React/Redux, LocalStorage, Axios. Implementation of responsive design to ensure good performance on different devices.

GetLocationByIP | *JS, leaflet, API*
- Integration with external APIs to get product information. Implementation of responsive design to ensure good performance on different devices.

HabbitsApp | *JS*
- A simple SPA in pure JavaScript using a functional approach. Adding tasks for a specific deadline.

BookApp | *JS, Network requests*
- A pure JS SPA application with an OOP approach. It interacts with a book database API, allowing users to search for books and add them to favorites.

ReactJournal | *React*
- A React SPA with the ability to add memories with a specific date and text. It also allows for data modification and user switching
