Summary

Experienced frontend developer specializing in creating modern and intuitive web applications. My key skills include working with HTML, CSS, JavaScript, TypeScript, React, Redux, and Next.js. I have successfully participated in large-scale projects, achieving significant improvements in user interaction and satisfaction.

I possess strong skills in cross-functional collaboration, data-driven decision-making, and fostering team growth. I am fluent in Russian and Ukrainian, with English proficiency at B1 level.

Professional Skills

JavaScript

Work experience

NDA

Frontend Developer

03/2023 - 03/2024

Developed and maintained gambling web applications using React, Redux, and Next.js. Collaborated with designers and backend developers to create engaging interfaces. Implemented responsive design for various devices and browsers. Optimized performance and integrated third-party APIs. Participated in code reviews and team meetings, contributing to code quality. Developed reusable components and maintained scalable front-end architecture. Stayed updated with industry trends and best practices.

Brainlab Studio

Frontend Developer

10/2022 - 03/2023

Development and support of web projects: landing pages, corporate websites, online stores, portfolios, e-commerce projects, and CRM systems. Collaborated with UX/UI designers, backend developers, and project managers to meet client requirements. Ensured responsive design and cross-browser compatibility. Optimized performance for faster loading and better user experience. Integrated third-party APIs to extend functionality. Maintained and updated existing projects, including refactoring, adding features, and fixing bugs.
